

Case Study

ZIPP™ System

5 Stages Completed in 10 Hrs.

Case Study No. 3002

DETAILS:

Location:	Loving County, TX
Formation:	Cherry Canyon
Casing Size:	5 1/2" 17#
Conveyance:	2" Coiled Tubing
Operation Depth:	4,583' (1397m)
Well Orientation:	Vertical
Number of Stages:	5
Tools Used:	ZIPP™ System

RESULTS:

The customer planned to perforate 5 stages in a vertical well with 5 1/2" 17# casing. Due to the proposed frac design, additional perforations were needed in zone 2 to enhance the production of the well. Utilizing the ability to customize zone isolation, the Thru Tubing Solutions' **ZIPP™ System** allowed additional perforations to be made on the same stage. In a single trip, all 5 stages were completed in 10 hours and eliminated the need for subsequent milling and cleanout operations.

HIGHLIGHTS

- Single Trip Perf-and-Frac
- Accurate Frac Placement
- No Additional Clean Out Run
- Customized Zone Isolation
