

# Innovative Solutions

## High Velocity, High Tensile Acid Wash Run

### HIGHLIGHTS

- Customized Solution
- Tools Rated to 10k psi
- Allowed for Injection

### DETAILS

Location	Offshore, GOM
Conveyance	2" Coiled Tubing
Operation Depth	27,340 Ft
Tools Used	2.0" Internal Dimple Connector 2.0" Back Pressure Valve 2.0" Weight Bars 2.0" Wash Nozzle

### OBJECTIVE

A customer in the Gulf of Mexico wanted to acidize through a high velocity, wash nozzle to clean out perforations.

### RESULTS

Due to the high tensile strength and hardness of the QT-130 CT being used, Thru Tubing Solutions customized a specific dimple connector and installation tool for this operation that was rated to 10K psi.

### VALUE TO CLIENT

Thru Tubing Solutions was able to efficiently complete four acid wash runs allowing the customer to inject into the formation.
